

# QToploader<sup>®</sup>

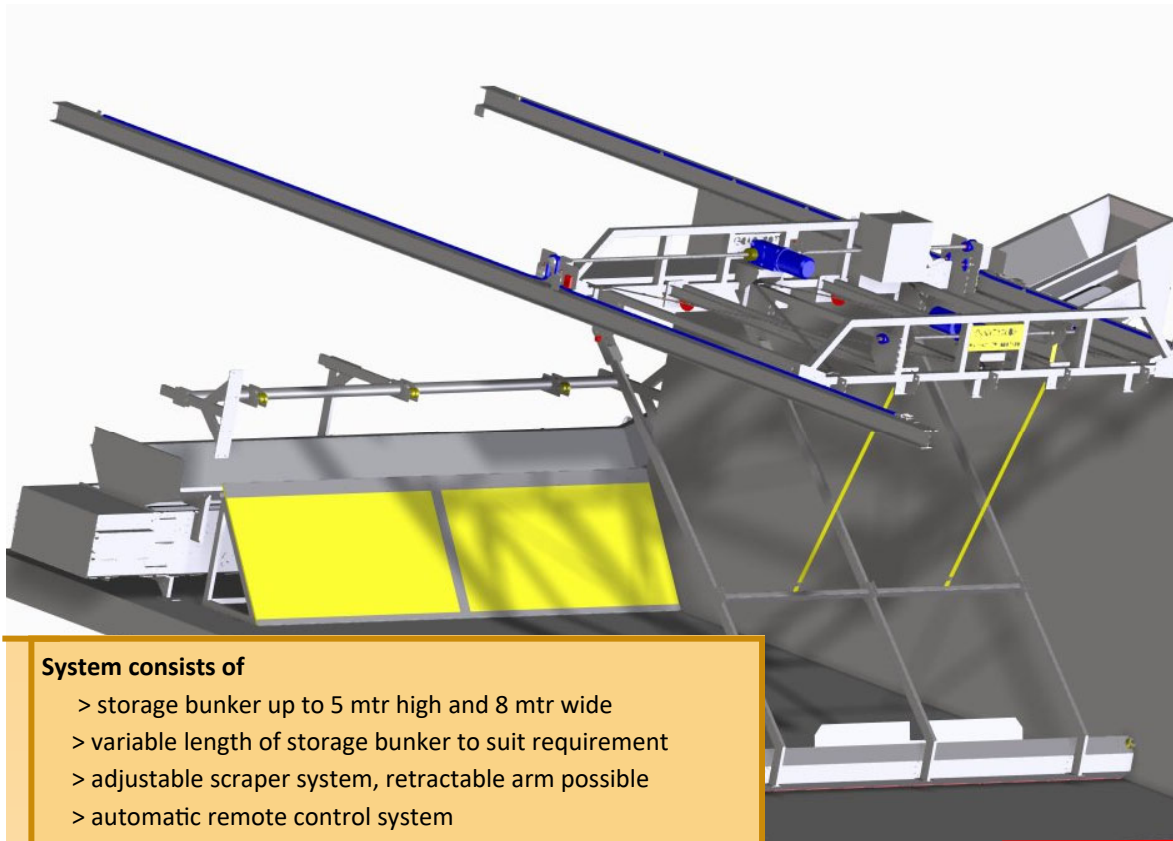

A UNIQUE FULLY AUTOMATED STORAGE AND DOSING SYSTEM

The innovative bulk handling solution for storing and automatic dosing of biomass, wood chips, peat, soil, grain, fertilizer, fibres, sawdust, bark, gravel, sludges, papermill rejects, rubber, manure, recycled plastics, RDF/SRF, by-products for digestors and other bulk products

QToploader International B.V.  
Prins Hendrikstraat 16  
NL-7001 GL Doetinchem  
Nederland

including new patented system

#### System consists of

- > storage bunker up to 5 mtr high and 8 mtr wide
- > variable length of storage bunker to suit requirement
- > adjustable scraper system, retractable arm possible
- > automatic remote control system

#### Key features

- > free access for delivery vehicles in storage area
- > 24/7 automatic dosing system, visual presentation of stock level
- > very competitive price compared to conventional dosing systems
- > standard version, **High Performance** and **Heavy Duty** versions
- > **Qmix** for controlled mixing and conditioning
- > **Qtwin** for optimal use of storage area, large volumes 1000-8000 m3

#### Advantages

- > easy construction of storage area, stacking of product in storage area
- > all moving parts on top of material, high reliability and easy access for servicing
- > only material to be dosed is moved, very low energy consumption

#### For more information please contact
